Call our office anytime between 8am-4pm Monday through Friday to schedule a pick-up. During non-business hours, please call our office at 541-265-7249 and leave a message on extension 107 or fastest service.

Drop Box & Compactor Regulations

Customer is ultimately responsible for what is in container. An extra charge of **\$25.00** will be applied for any prohibited items found in box without prior notice and arrangements being made with office. **\$25.00** will also be applied to remove prohibited item from the drop box for a total of **\$50 for the prohibited item + removal**. The Drop Box needs to be emptied at least once every 7 days. On the 8th day a **\$46.75 city, \$49.70 county/** per day demurrage will be added. The boxes can be used for disposal of bulky materials, light demolition, or other general cleanup projects.

- If you are disposing of dirt, rock, sod, concrete or any other heavy dense material, then a 20 or 30 cubic yard drop box is the only size we can allow (filling the drop box 1/2 full).
- If you are disposing of composite (3-tab, asphalt shingle) roofing material, then a 20 or 30 cubic yard drop box is the largest size we can allow (filling the drop box 1/2 full).

UNACCEPTABLE ITEMS:

- E-waste (TV's computers, and computer monitors)
- Liquids that will pass through a paint filter
- Hazardous Waste and Liquids (i.e. liquid paint, liquid pesticides, liquid chemicals, asbestos, vehicle batteries)
- infectious waste, medical waste, or radioactive waste as defined by applicable federal, state, or local laws or regulations.
- The following items banned from landfills can be placed in a drop box, but TSS needs to be informed: Large Appliances and Automobile tires

Overfilled Containers, Relocation, Damage, and Blocked Pick-ups:

Overfilled containers = no pick up. Debris should be no higher than the top of the box, as the truck's tarp must cover the load completely. Customer will be responsible for unloading any excess debris if drop box is overloaded. If container has to be relocated by Thompson's Sanitary Service or is "blocked" when driver arrives, an extra haul charge will be applied. A "blocked" container is when our driver is unable to access the container with equipment.

As a drop box customer, you will be responsible for all fees incurred including delivery, haul, disposal and may include additional fees such as: rent, damage to box, testing, clean-up, abatement of unacceptable items, etc... Debris box containers provided by Thompson's Sanitary Service Inc. are to be used for their intended purpose only and container placement is not to be relocated without permission from TSS. Proper care of company-provided debris box containers is the responsibility of the customer. Customer is responsible for all damages to debris box containers exceeding normal wear and tear.

All Construction and Demolition debris must be accompanied with documentation proving the load does not contain asbestos-containing material- a Construction and Demolition Waste Acceptance Form. If any material in the box could be considered suspect for Asbestos-Containing Material (ACM), including but not limited to flooring, sheetrock, duct work, roofing material, plaster, popcorn ceiling, or anything else that looks like it came from a remodel or demolition, the hauler and/or disposal site may refuse the box until the customer can provide documentation proving the load does not contain ACM. If a box is picked up and undeclared, suspect, ACM is discovered at the transfer station, the customer will be charged for all cleanup costs.

Cleanups could range in the thousands of dollars.

CONSTRUCTION AND DEMOLITION WASTE ACCEPTANCE FORM

To protect the health and safety of our employees and customers, all loads of construction, remodeling and demolition waste brought to the Agate Beach Transfer Station is screened before, during, and after unloading, for materials that may contain asbestos. This form is required for all such loads of waste that contain construction and demolition waste.

Analytical test results are required for the following products commonly known to contain asbestos:

- **Interior walls and ceilings:** acoustical tiles, glue dots, plaster, and textured surfaces
- **Exterior walls:** cement siding, stucco
- **Flooring:** vinyl tiles, sheet vinyl, some mastic adhesives
- **Insulation/fireproofing:** block, boiler, spray-applied, vermiculite, monokote, sink undercoating, thermal system insulation (fiberglass, cellulose, and mineral wool are exempt)
- **Gaskets:** furnace, mechanical, boiler, wood stove (automotive gaskets are exempt)
- **Heating:** white paper or seam tape on ducts, air-duct cement and insulation
- **Roofing materials:** tar paper, felt, silver/white roofing paint, Nicolite paper
Note: three tab composition shingles do not contain asbestos
- **Fire doors, fire/kiln brick and fireproofing**
- **Various compounds:** window glazing, adhesives, caulks, patching, mastics, vapor barrier products (plastic or synthetic materials such as Tyvek are exempt)
- **Electrical:** switch gear, circuit boxes and fuse panels; wiring with cloth insulation (Romex wiring is exempt)

INSTRUCTIONS FOR FILLING OUT THIS FORM

- This form is required for all loads containing construction, demolition, or renovation material.
- This form should be completed by the person responsible for and knowledgeable about the contents of the load.
- For multiple-load projects, copies of this form will be accepted, but the contents of the load must match the description of the waste materials on the form.

All parties involved (generator, contractor, and hauler) may be held responsible for the abatement of positive (greater than one percent asbestos by weight) asbestos-containing materials unloaded at SCT's transfer stations, including but not limited to the costs for testing, a licensed abatement contractor, fines, and administration.

CONSTRUCTION AND DEMOLITION WASTE ACCEPTANCE FORM

1. When did the construction, demolition, or renovation materials originate from the structure or RV?
 - Was the material constructed after Jan 1, 2004 (skip to #3, you do not need an asbestos survey)
 - Is the material bare wood, metal, glass, or three tab composition shingles with no tar paper. (skip to #3, you do not need an asbestos survey)
 - Was the material constructed before Jan 1, 2004 or Commercial Building (proceed to #2)
2. Was an asbestos survey conducted?
 - Yes-if yes, attach the survey. A survey was conducted, if there was any asbestos containing materials (ACM), they were identified in the survey, and submittal of this form is my statement that the ACM materials are not present in this load. Proceed to #4.
 - No -**if no, a survey has to be conducted on construction, demolition, or renovation debris constructed before 1/1/2004. We are sorry, we cannot accept your load without a survey.**
3. Material was constructed after Jan 1, 2004, therefore no survey is required, and I verify there is no asbestos containing material present in this load.

Address of work site: _____

Property owner: _____

Phone: _____

If billing to a TSS Account:

Name on account: _____ or account # if known: _____

Mailing address (if different than work site): _____

4. Hauled by:
 - o Thompson's Sanitary Service Drop Box
 - o Self Hauling
 - o Construction Contractor

License plate number of hauling vehicle (not needed if it's a drop box): _____

Name of Contractor: _____

Contact Name: _____

Phone Number: _____

5. Description of waste: (example- roofing, siding, decking, bathroom, flooring, whole house...)

6. Certification: I certify that the above information is true and correct to the best of my knowledge, and that the documentation presented represents the materials delivered to Agate Beach Transfer Station. I also attest that the waste materials in this load do not contain asbestos.
